Pierre Villars

Space groups (166) R-3m - (160) R3m (Landolt-Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series) Pierre Villars

In the 1970s Landolt-Börnstein published a series of volumes containing crystallographic data for organic (III/5 Structure Data of Organic Crystals), intermetallic (III/6 Structure Data of Elements and Intermetallic phases) and inorganic compounds (III/7 Crystal Structure Data of Inorganic Compounds). During the 30 years that have passed, the experimental methods leading to a complete structure determination have considerably improved and the large number of crystal structures known today justifies the publication of a new compilation. The present volume will cover both intermetallic and classical inorganic compounds, a clear limit having been drawn by excluding compounds that contain C-H bonds. Whereas the earlier edition listed space group/crystal system and cell parameters for different classes of compounds, we have here chosen a different approach by grouping known crystal structures into structure types. The structure type concept is widely used among inorganic compounds, where the number of isotypic compounds can reach several hundreds. The first subvolumes will contain complete crystallographic data sets, including atom coordinates, that represent distinct structure types, whereas the last subvolumes will list cell parameters of isotypic compounds. The crystallographic data are accompanied by remarks and crystallographic features common to isotypic compounds, such as the atomic environments, a brief description of the main structural features, and drawings of selected structure types.

From reader reviews:

Shane Ward:

Why don't make it to be your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite book and reading a guide. Beside you can solve your condition; you can add your knowledge by the reserve entitled Space groups (166) R-3m - (160) R3m (Landolt-Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series). Try to make the book Space groups (166) R-3m - (160) R3m (Landolt-Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series) as your friend. It means that it can being your friend when you experience alone and beside that of course make you smarter than previously. Yeah, it is very fortunate for yourself. The book makes you more confidence because you can know every thing by the book. So , let me make new experience and knowledge with this book.

Goldie Oleary:

What do you consider book? It is just for students because they're still students or it for all people in the world, what best subject for that? Simply you can be answered for that query above. Every person has diverse personality and hobby per other. Don't to be obligated someone or something that they don't need do that. You must know how great and also important the book Space groups (166) R-3m - (160) R3m (Landolt-Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series). All type of book can you see on many sources. You can look for the internet sources or other social media.

Kaye Hensley:

Often the book Space groups (166) R-3m - (160) R3m (Landolt-Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series) will bring you to definitely the new experience of reading any book. The author style to spell out the idea is very unique. In the event you try to find new book you just read, this book very suited to you. The book Space groups (166) R-3m - (160) R3m (Landolt-Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series) is much recommended to you to learn. You can also get the e-book from your official web site, so you can quicker to read the book.

Suzanne Robbins:

As we know that book is vital thing to add our understanding for everything. By a reserve we can know everything we want. A book is a pair of written, printed, illustrated or perhaps blank sheet. Every year was exactly added. This book Space groups (166) R-3m - (160) R3m (Landolt-Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series) was filled in relation to science. Spend your free time to add your knowledge about your research competence. Some people has different feel when they reading any book. If you know how big benefit of a book, you can really feel enjoy to read a guide. In the modern era like at this point, many ways to get book you wanted.
