## **Evaluating Mineral Projects: Applications and Misconceptions** Thomas F. Torries

Whether you're an experienced evaluator of mineral projects, a student, or a decision maker who is not a practitioner but must use evaluation results, this new book is an essential reference for your bookshelf. Designed to complement traditional engineering texts, this book emphasizes the concepts of mineral project evaluation rather than computational details. It describes various economic evaluation techniques typically employed (including conventional cost analysis, discounted cash flow, and option analysis), their uses, and their relationships with geological, technological, and financial evaluations. Also discussed are the strengths and weaknesses of commonly practiced evaluation methods.

This book explains the practical difficulties in conducting an analysis and correctly interpreting the results, as well as the use of alternative techniques. Because many existing texts do not adequately discuss the meanings and application of merit measures, such as net present value (NPV) or internal rate of return (IRR), this book represents an exciting departure from standard reference tools. Contents include:

- why NPV and IRR are both valid and useful merit measures
- the shortcomings of conventional NPV and IRR analysis
- the dangers of scenario analysis
- why conventional incremental analysis is not needed to correctly calculate IRR
- why the desire to achieve NPV-consistent IRR is misleading
- how competitive cost analysis is conducted and used
- why option pricing is an important addition to the evaluation process.

When used correctly, evaluation methods are powerful tools to help us understand the economics of investment projects. Don't miss out on this new source. Contains glossary and full index.

### **From reader reviews:**

#### **Patricia Clay:**

Information is provisions for folks to get better life, information today can get by anyone with everywhere. The information can be a information or any news even an issue. What people must be consider when those information which is within the former life are hard to be find than now's taking seriously which one is suitable to believe or which one often the resource are convinced. If you find the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All of those possibilities will not happen with you if you take Evaluating Mineral Projects: Applications and Misconceptions as your daily resource information.

#### **Terrance Hutchins:**

Reading a reserve can be one of a lot of activity that everyone in the world adores. Do you like reading book so. There are a lot of reasons why people love it. First reading a publication will give you a lot of new info. When you read a book you will get new information because book is one of numerous ways to share the information or their idea. Second, looking at a book will make you more imaginative. When you looking at a book especially tale fantasy book the author will bring one to imagine the story how the figures do it anything. Third, you are able to share your knowledge to other folks. When you read this Evaluating Mineral Projects: Applications and Misconceptions, you are able to tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire the others, make them reading a guide.

#### **Deborah Ayers:**

Spent a free time for you to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their own friends. Usually they performing activity like watching television, about to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Might be reading a book can be option to fill your no cost time/ holiday. The first thing that you will ask may be what kinds of e-book that you should read. If you want to test look for book, may be the publication untitled Evaluating Mineral Projects: Applications and Misconceptions can be good book to read. May be it can be best activity to you.

#### **Ronny Baird:**

In this era globalization it is important to someone to find information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of recommendations to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher that print many kinds of book. Typically the book that recommended for your requirements is Evaluating Mineral Projects: Applications and Misconceptions this e-book consist a lot of the information from the condition of this world now. This specific book was represented just how can the world has grown up. The dialect styles that writer require to explain it is easy to understand. Often the writer

made some investigation when he makes this book. This is why this book suited all of you.
