Professional ASP.NET Performance Matt Odhner, Doug Thews, James Avery, James Greenwood, Andrew Reid, K. Scott Allen

If you want to build ASP.NET applications that perform well, you need this book.

This book will show you how to use the features offered by ASP.NET to develop efficient applications that will make the most of the hardware they run on.

The book covers:

How ASP.NET concepts relate to application performance

Designing for performance

Techniques for maximizing the performance of code

Using caching effectively

High performance data access

Performance Testing (including the ACT system that is integrated with Visual Studio .NET and the free WAS tool)

Tuning underperforming applications

Monitoring performance with built in and custom performance counters

The code in this book is presented in Visual Basic .NET
