Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) Laura Fernández Gallardo

This work addresses the evaluation of the human and the automatic speaker recognition performances under different channel distortions caused by bandwidth limitation, codecs, and electro-acoustic user interfaces, among other impairments. Its main contribution is the demonstration of the benefits of communication channels of extended bandwidth, together with an insight into how speaker-specific characteristics of speech are preserved through different transmissions. It provides sufficient motivation for considering speaker recognition as a criterion for the migration from narrowband to enhanced bandwidths, such as wideband and super-wideband.

From reader reviews:

Jesse Valles:

Book will be written, printed, or illustrated for everything. You can learn everything you want by a book. Book has a different type. As you may know that book is important matter to bring us around the world. Close to that you can your reading skill was fluently. A publication Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) will make you to be smarter. You can feel considerably more confidence if you can know about almost everything. But some of you think which open or reading a new book make you bored. It is far from make you fun. Why they can be thought like that? Have you looking for best book or suited book with you?

Gary McIntosh:

Information is provisions for folks to get better life, information today can get by anyone on everywhere. The information can be a knowledge or any news even restricted. What people must be consider any time those information which is from the former life are hard to be find than now's taking seriously which one is suitable to believe or which one the resource are convinced. If you obtain the unstable resource then you get it as your main information you will have huge disadvantage for you. All those possibilities will not happen throughout you if you take Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) as the daily resource information.

Mindy Munson:

Many people spending their period by playing outside together with friends, fun activity along with family or just watching TV the entire day. You can have new activity to spend your whole day by reading a book. Ugh, you think reading a book will surely hard because you have to bring the book everywhere? It ok you can have the e-book, delivering everywhere you want in your Touch screen phone. Like Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) which is obtaining the e-book version. So , try out this book? Let's observe.

Richard Rodriguez:

As a student exactly feel bored to be able to reading. If their teacher asked them to go to the library in order to make summary for some publication, they are complained. Just tiny students that has reading's soul or real their hobby. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that examining is not important, boring as well as can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) can make you truly feel more interested to read.
