Mathematical Methods for Economic Theory 2 (Studies in Economic Theory)

James C. Moore

Mathematical Methods for Economic Theory 2 (Studies in Economic Theory)

James C. Moore

Mathematical Methods for Economic Theory 2 (Studies in Economic Theory) James C. Moore
This two-volume work functions both as a textbook for graduates and as a reference for economic scholars. Assuming only the minimal mathematics background required of every second-year graduate in economics, the two volumes provide a self-contained and careful development of mathematics through locally convex topological vector spaces, and fixed-point, separation, and selection theorems in such spaces. This second volume introduces general topology, the theory of correspondences on and into topological spaces, Banach spaces, topological vector spaces, and maximum, fixed-point, and selection theorems for such spaces
