Mastering Java for Data Science

Alexey Grigorev

Mastering Java for Data Science Alexey Grigorev

Key Features

- This comprehensive book shows you exactly how you can take your Java data science applications to production seamlessly
- Dive deep into analytics, supervised and unsupervised learning, and much more with ease
- Explore Java's various libraries to efficiently build and deploy data applications for the enterprise

Book Description

Java is the language of choice if you want to bring data science to production, thanks to its stability and rich set of libraries. Major big data solutions including Hadoop are written in Java. This book will teach you how to perform data analysis on big data in a much more sophisticated manner. If you are willing to take your data products to enterprise without changing your stack, this book will tell you how to do it with ease.

This book will quickly brush up on what you already know about using Java in data science applications and will then dive quickly into the advanced concepts to implement data science in production. The book covers topics such as advanced data science algorithms, preparing tricky data, advanced clustering, regression, classification, prediction, machine learning, and more.

We'll teach you how data science can be used effectively to analyze unstructured data and big data. This book will enable you to tackle the problems of advanced visualization, advanced statistics, scaling data science applications, deploying these applications in production, and many more. You will also learn about natural language processing, real-time analytics, deep learning, and neural networks.

What you will learn

- Get a solid understanding of the data processing toolbox available in Java
- Explore the data science ecosystem available in Java and other JVM languages
- Understand when to use Java and what is best to do outside of Java
- Deal with the machine learning task at hand and bring the results directly to production
- Get state-of-the-art performance with xgboost and deeplearning4j
- Build applications that scale and process large amounts of data in real time

About the Author

Alexey Grigorev is a skilled Data Scientist and Software Engineer with more than five years of professional experience. Now he works as a Data Scientist at Searchmetrics Inc. In his day-to-day job, he actively uses R and Python for data cleaning, data analysis, and modeling. He is a reviewer of other Packt Publishing books on data analysis such as Test-Driven Machine Learning and Mastering Data Analysis with R

You can find him LinkedIn at https://de.linkedin.com/in/agrigorev.

From reader reviews:

George Hartzell:

This Mastering Java for Data Science book is simply not ordinary book, you have it then the world is in your hands. The benefit you receive by reading this book is usually information inside this book incredible fresh, you will get details which is getting deeper anyone read a lot of information you will get. This kind of Mastering Java for Data Science without we comprehend teach the one who looking at it become critical in thinking and analyzing. Don't become worry Mastering Java for Data Science can bring once you are and not make your handbag space or bookshelves' grow to be full because you can have it inside your lovely laptop even telephone. This Mastering Java for Data Science having great arrangement in word and layout, so you will not truly feel uninterested in reading.

Eric Alaniz:

Playing with family in a very park, coming to see the water world or hanging out with buddies is thing that usually you have done when you have spare time, in that case why you don't try point that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Mastering Java for Data Science, it is possible to enjoy both. It is excellent combination right, you still want to miss it? What kind of hang-out type is it? Oh seriously its mind hangout folks. What? Still don't get it, oh come on its known as reading friends.

Gerald Sosa:

A lot of publication has printed but it differs. You can get it by internet on social media. You can choose the most effective book for you, science, amusing, novel, or whatever by searching from it. It is known as of book Mastering Java for Data Science. You'll be able to your knowledge by it. Without departing the printed book, it could add your knowledge and make you happier to read. It is most significant that, you must aware about guide. It can bring you from one location to other place.

James Esparza:

E-book is one of source of knowledge. We can add our understanding from it. Not only for students but native or citizen will need book to know the revise information of year for you to year. As we know those ebooks have many advantages. Beside we add our knowledge, can also bring us to around the world. Through the book Mastering Java for Data Science we can consider more advantage. Don't you to definitely be creative people? To become creative person must choose to read a book. Just choose the best book that suitable with your aim. Don't become doubt to change your life at this time book Mastering Java for Data Science. You can more pleasing than now.
