## **The Silver Manifesto** David Morgan, Christopher Marchese

This may be the most important "hard money" book to be published in quite some time. Fortunes have been made by those who bought silver around the \$5.00 level and paid attention to the call of the top at over \$48.00 by David Morgan. Yet the big money lies ahead, according to the authors, as much as 90 percent of the move occurs within the last 10 percent of the time.

There are factors that produce immense profits and these occur rarely. Investors stand at a unique point in monetary history where the death of paper currencies on a global scale is taking place before their eyes. Because most are frozen into inside-the-box thinking, few investors will ride the next move as silver (and gold) skyrocket in the years ahead. In fact the primary purpose of this book is to educate the reader as to why there is no way out of the financial morass created by the financial elite. We have reached the point where the savvy few understand what is happening and take action, while the rest are left watching, thinking the precious metals bull market is dead. The authors explore when to expect the next bull market to begin and why, how the 2008 financial crisis has been "papered over" and what to watch for going forward. The real supply and demand looking at both industrial and monetary demand. Money and Banking - what fractional reserve banking means to currency and bullion. The best surest method to stay in the profit zone and not worry about the wild price swings. How to pick a mining company-this information is priceless. Most who are taught this methodology have a degree in finance, but we break it down for the average investor. The silver manipulation story-the facts, more facts, and the irrefutable facts. The biggest concern of all investors: The Debt Bomb!
