Shapes are everywhere, and math students get a chance to explore shapes and their attributes, all while having fun. Familiar storylines and relatable contexts help students practice various principles of geometry, such as composing two-dimensional shapes, decomposing and partitioning shapes, and distinguishing between defining and non-defining attributes. Bright visuals reinforce the essential math concepts that every geometry student must master. This volume follows a relatable narrator while they practice drawing common, everyday shapes. Readers will learn shapes and their attributes in order to get a foundation for understanding geometry. This volume satisfies CCSS Math Standard 1.G.A.2.
