National Aeronautics and Space Administration, Judy A. Rumerman

In 1973, NASA published the first volume of the NASA Historical Data Book, a hefty tome containing mostly tabular data on the resources of the space Agency between 1958 and 1968. There, broken into detailed tables, were facts and figures associated with the budget, facilities, procurement, installations, and personnel of NASA during that formative decade. In 1988, NASA reissued that first volume of the data book and added two additional volumes (one for 1958–1968 and one for 1969–1978) on the Agency's programs and projects. NASA published a fourth volume in 1994 that addressed NASA's resources for the period between 1969 and 1978. In 1999, it published volume V of the data book, which contained narrative and tabular information on the Agency's launch systems, space transportation, human spaceflight, and space science programs between 1979 and 1988. Volume VI, published in 2000, was a continuation of those earlier efforts and addressed the Agency's space applications efforts, the development and operation of aeronautics and space research and technology programs, tracking and data acquisition/space operations, commercial programs, facilities and installations, personnel, and finances and procurement during that era. Volume VII, published in 2008, addressed the decade from 1989 to 1998. It consisted of narrative and tabular material on the Agency's launch systems, space transportation, human spaceflight, and space science programs. This eighth volume continues those earlier efforts. This fundamental reference tool presents information, much of it statistical, documenting the development of several critical areas of NASA responsibility for the period between 1989 and 1998. This volume includes detailed information on NASA's Earth science/space applications efforts, the development and operation of aeronautics and space research and technology programs, tracking and data acquisition/space operations, facilities and installations, personnel, and finances and procurement during this era.

**From reader reviews:**

**Adrian Woodson:**

With other case, little individuals like to read book NASA Historical Data Book: Volume VIII: NASA Earth Science and Space Applications, Aeronautics, Technology, and Exploration, Tracking and Data ... Resources 1989-1998 (The NASA History Series). You can choose the best book if you like reading a book. Provided that we know about how is important some sort of book NASA Historical Data Book: Volume VIII: NASA Earth Science and Space Applications, Aeronautics, Technology, and Exploration, Tracking and Data ... Resources 1989-1998 (The NASA History Series). You can add information and of course you can around the world by just a book. Absolutely right, mainly because from book you can know everything! From your country till foreign or abroad you will end up known. About simple factor until wonderful thing it is possible to know that. In this era, we are able to open a book as well as searching by internet system. It is called e-book. You should use it when you feel fed up to go to the library. Let's examine.

**Homer Douglas:**

What do you concerning book? It is not important to you? Or just adding material when you require something to explain what the one you have problem? How about your time? Or are you busy man? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? Everyone has many questions above. They need to answer that question mainly because just their can do that will. It said that about e-book. Book is familiar in each person. Yes, it is right. Because start from on kindergarten until university need this NASA Historical Data Book: Volume VIII: NASA Earth Science and Space Applications, Aeronautics, Technology, and Exploration, Tracking and Data ... Resources 1989-1998 (The NASA History Series) to read.

**Willie Wilson:**

Reading a guide can be one of a lot of activity that everyone in the world adores. Do you like reading book consequently. There are a lot of reasons why people like it. First reading a publication will give you a lot of new info. When you read a guide you will get new information since book is one of various ways to share the information or even their idea. Second, studying a book will make you actually more imaginative. When you looking at a book especially fictional book the author will bring one to imagine the story how the character types do it anything. Third, you are able to share your knowledge to some others. When you read this NASA Historical Data Book: Volume VIII: NASA Earth Science and Space Applications, Aeronautics, Technology, and Exploration, Tracking and Data ... Resources 1989-1998 (The NASA History Series), you could tells your family, friends and soon about yours guide. Your knowledge can inspire others, make them reading a publication.

**Alma Medina:**

Reading a e-book make you to get more knowledge from this. You can take knowledge and information from the book. Book is published or printed or outlined from each source that filled update of news. Within this modern era like today, many ways to get information are available for a person. From media social similar to newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just looking for the NASA Historical Data Book: Volume VIII: NASA Earth Science and Space Applications, Aeronautics, Technology, and Exploration, Tracking and Data ... Resources 1989-1998 (The NASA History Series) when you essential it?
