The Geometry of Complex Domains (Progress in Mathematics)

Robert E. Greene, Kang-Tae Kim, Steven G Krantz

The Geometry of Complex Domains (Progress in Mathematics) Robert E. Greene, Kang-Tae Kim, Steven G Krantz

This work examines a rich tapestry of themes and concepts and provides a comprehensive treatment of an important area of mathematics, while simultaneously covering a broader area of the geometry of domains in complex space. At once authoritative and accessible, this text touches upon many important parts of modern mathematics: complex geometry, equivalent embeddings, Bergman and Kahler geometry, curvatures, differential invariants, boundary asymptotics of geometries, group actions, and moduli spaces.

The Geometry of Complex Domains can serve as a "coming of age" book for a graduate student who has completed at least one semester or more of complex analysis, and will be most welcomed by analysts and geometers engaged in current research.

From reader reviews:

Dawn Campbell:

Book is written, printed, or created for everything. You can recognize everything you want by a reserve. Book has a different type. As you may know that book is important thing to bring us around the world. Beside that you can your reading talent was fluently. A e-book The Geometry of Complex Domains (Progress in Mathematics) will make you to always be smarter. You can feel a lot more confidence if you can know about almost everything. But some of you think that open or reading any book make you bored. It's not make you fun. Why they can be thought like that? Have you trying to find best book or appropriate book with you?

Esther Belote:

This book untitled The Geometry of Complex Domains (Progress in Mathematics) to be one of several books that best seller in this year, honestly, that is because when you read this book you can get a lot of benefit into it. You will easily to buy this specific book in the book store or you can order it through online. The publisher on this book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Mobile phone. So there is no reason for you to past this publication from your list.

Maureen Bonds:

Reading a book can be one of a lot of task that everyone in the world adores. Do you like reading book thus. There are a lot of reasons why people fantastic. First reading a publication will give you a lot of new facts. When you read a reserve you will get new information because book is one of a number of ways to share the information or even their idea. Second, looking at a book will make you more imaginative. When you reading a book especially hype book the author will bring someone to imagine the story how the characters do it anything. Third, you can share your knowledge to others. When you read this The Geometry of Complex Domains (Progress in Mathematics), it is possible to tells your family, friends along with soon about yours guide. Your knowledge can inspire different ones, make them reading a book.

Donna Bledsoe:

In this period globalization it is important to someone to find information. The information will make someone to understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of referrals to get information example: internet, newspapers, book, and soon. You will see that now, a lot of publisher in which print many kinds of book. Typically the book that recommended for you is The Geometry of Complex Domains (Progress in Mathematics) this e-book consist a lot of the information on the condition of this world now. This kind of book was represented how does the world has grown up. The dialect styles that writer make usage of to explain it is easy to understand. The particular writer made some investigation when he makes this book. Here is why this book suited all of you.
