Management of the Motor Disorders of Children with Cerebral Palsy

David Scrutton, Margaret Mayston

Management of the Motor Disorders of Children with Cerebral Palsy David Scrutton, Margaret Mayston

Clinics in Developmental Medicine No. 161

Since the first edition of this book was published in 1984 the intensive debates about the 'correct' method of treatment for children with cerebral palsy have been resolved and it is now possible to describe what is generally agreed to be the optimal approach. This entirely rewritten new edition describes the most up-to-date thinking, with two new editors from America and Australia reflecting the worldwide picture. Coverage includes the coordination of care and the management team; the types of cerebral palsy; assessment; goal-setting; learning and neural plasticity; global therapeutic approaches as well as more focused (topical) therapies; the mechanisms of deformity, its prevention and treatment; and the transition to adult life. This book details the advancement of the subject from 1984 to 2002.
