## **Materials, Design and Technology (Australian Technology Studies) Ray Stevens**

Materials, Design and Technology introduces the secondary student to technology studies. Although specifically for the VCE Technology Studies units it assumes little if any knowledge is held by the student. It introduces the history of technology and its impact on Australia in the past and into the future. The work requirements for VCE are examined and are written in a way to be suitable to technology students in any state. The problem solving process is the key to this approach to technology studies and the importance of this is brought out by the emphasis on the design process. Students are guided step by step through the design process, models and their own research and problem solving. This book on technology studies is written specifically for students to help them cope with the demands of new technology subjects such as those in VCE Design and Technology and VCE Materials and Technology.
