Interpersonal Technology: The Art and Science of Personal and Professional Effectiveness

James A. Gwaltney

Interpersonal Technology: The Art and Science of Personal and Professional Effectiveness James A. Gwaltney

Once available only in seminar form, the insights of the Interpersonal Technology system have now been captured and expanded in this work. Interpersonal Technology shares invaluable insight into eight key success skills by revealing the firsthand experience of eight CEOs who embody real life examples of these skills. This logical and practical system gives us insight into our own style of relating, differences in our decision-making approaches, how we go about getting things accomplished, and a look at our natural cadence or pace. Using both verbal and nonverbal information, Interpersonal Technology does more than simply provide insight; it provides practical direction in how to improve our interactions in both our personal and professional lives.
