Diabetes and the Brain

Diabetes and the Brain includes in one complete volume all of the latest, most vital research on the relationship between this unique organ and diabetes. Incredible new understandings of this condition have been made in recent years, and much of that key research has been published in the highly regarded scholarly journals of the American Diabetes Association, *Diabetes* and *Diabetes Care*.

It is essential that diabetes care providers and researchers have as complete an understanding of how diabetes affects the entire body and all of its organs, including the brain. Achieving this requires knowing the latest data on diabetes from the most reliable sources out there.

Articles are selected for this volume based on their clinical relevance, as shown by the number of citations through other published medical articles and by the number of times the article was viewed online. A steering committee that consists of the top medical staff at the Association then pares down the list to the most important articles on the subject. No article is older than five years, ensuring that only the latest and most relevant information is contained in the volume.
