Econophysics of Stock and other Markets: Proceedings of the Econophys-Kolkata II (New Economic Windows)

Successful or not, we all (have to?) go to various markets and participate in their activities. Yet, solittle is understoodabout their functionings. E orts to model various markets are now substantial. Econophysicists have also come up recently with several innovative models and their analyses. This book is a proceedings of the International Workshop on Eco- physics of StockMarkets and Minority

Games,"heldinKolkataduringFeb- ary 14-17, 2006, under the auspices of the Centre for Applied Mathem- ics and Computational Science, Saha Institute of Nuclear Physics, Kolkata. This is the second event in the Econophys-Kolkata series of meetings; the Econophys-Kolkata I was held in March 2005 (Proceedings: Econophysics of Wealth Distributions, published in the same New Economic Windows series by Springer, Milan in 2005). We understand from the enthusiastic response of the participants that the one-day trip to the Sunderbans (Tiger Reserve; a world heritage point) along with the lecture-sessions on the vessel had been hugely enjoyable and successful. The concluding session had again very lively discussions on the workshop topics as well as on econophysics in general, i- tiated by J. Barkley Rosser, Matteo Marsili, Rosario Mantegna and Robin Stinchcombe (Chair). We plan to hold the next meeting in this series, on Econophysics and Sociophysics: Debates on Complexity Issues in Economics and Sociology" early next year. We are very happy that several leading economists and physicists engaged intheserecentdevelopmentsintheeconophysicsofmarkets, theiranalysisand modellingcouldcomeandparticipate.
