**Computer Systems Architecture (Chapman & Hall/CRC Textbooks in Computing)** Aharon Yadin

**Computer Systems Architecture** provides IT professionals and students with the necessary understanding of computer hardware. It addresses the ongoing issues related to computer hardware and discusses the solutions supplied by the industry.

The book describes trends in computing solutions that led to the current available infrastructures, tracing the initial need for computers to recent concepts such as the Internet of Things. It covers computers' data representation, explains how computer architecture and its underlying meaning changed over the years, and examines the implementations and performance enhancements of the central processing unit (CPU). It then discusses the organization, hierarchy, and performance considerations of computer memory as applied by the operating system and illustrates how cache memory significantly improves performance.

The author proceeds to explore the bus system, algorithms for ensuring data integrity, input and output (I/O) components, methods for performing I/O, various aspects relevant to software engineering, and nonvolatile storage devices, such as hard drives and technologies for enhancing performance and reliability. He also describes virtualization and cloud computing and the emergence of software-based systems' architectures.

Accessible to software engineers and developers as well as students in IT disciplines, this book enhances readers' understanding of the hardware infrastructure used in software engineering projects. It enables readers to better optimize system usage by focusing on the principles used in hardware systems design and the methods for enhancing performance.

### **From reader reviews:**

#### **Bobbie Flores:**

Book is usually written, printed, or highlighted for everything. You can recognize everything you want by a reserve. Book has a different type. As it is known to us that book is important thing to bring us around the world. Next to that you can your reading ability was fluently. A publication Computer Systems Architecture (Chapman & Hall/CRC Textbooks in Computing) will make you to become smarter. You can feel a lot more confidence if you can know about everything. But some of you think that open or reading any book make you bored. It is not make you fun. Why they may be thought like that? Have you looking for best book or suited book with you?

#### **Lisa Gaither:**

This Computer Systems Architecture (Chapman & Hall/CRC Textbooks in Computing) book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is information inside this publication incredible fresh, you will get facts which is getting deeper you actually read a lot of information you will get. This particular Computer Systems Architecture (Chapman & Hall/CRC Textbooks in Computing) without we realize teach the one who reading through it become critical in considering and analyzing. Don't be worry Computer Systems Architecture (Chapman & Hall/CRC Textbooks in Computing) can bring any time you are and not make your bag space or bookshelves' turn into full because you can have it in your lovely laptop even cell phone. This Computer Systems Architecture (Chapman & Hall/CRC Textbooks in Computing) having great arrangement in word and layout, so you will not sense uninterested in reading.

#### **Mitchell Smith:**

The book Computer Systems Architecture (Chapman & Hall/CRC Textbooks in Computing) has a lot info on it. So when you read this book you can get a lot of help. The book was authored by the very famous author. Mcdougal makes some research prior to write this book. This particular book very easy to read you can obtain the point easily after reading this book.

#### **Margaret Padua:**

Your reading 6th sense will not betray anyone, why because this Computer Systems Architecture (Chapman & Hall/CRC Textbooks in Computing) book written by well-known writer we are excited for well how to make book which might be understand by anyone who read the book. Written within good manner for you, leaking every ideas and publishing skill only for eliminate your personal hunger then you still skepticism Computer Systems Architecture (Chapman & Hall/CRC Textbooks in Computing) as good book but not only by the cover but also with the content. This is one book that can break don't assess book by its handle, so do you still needing a different sixth sense to pick this kind of!? Oh come on your looking at sixth sense already alerted you so why you have to listening to an additional sixth sense.
