A few people have naturally straight teeth that fit together perfectly. For everyone else, there is orthodontic care. Orthodontia is the branch of dentistry that deals with abnormalities of the teeth and face. Orthodontic care involves the use of devices, such as braces, to: Straighten teeth; correct problems with bite; close gaps between teeth; align lips and teeth properly. Most people who receive orthodontic care are kids, but adults get braces, too. In young children, orthodontic treatment may guide proper jaw growth. This can help permanent teeth to come in properly.
